## **Notes to the Unaudited Condensed Consolidated Interim Financial Statements For the Three and Six Months Ended September 30, 2021 and 2020 (Expressed in US Dollars)**

---

### **1. Nature of Operations**

---

The Company's business focuses on high growth, high impact energy projects - primarily through identifying, acquiring, and exploring oil and gas assets, and more recently, through the development of renewable energy projects. The Company's key oil and gas assets include an interest in the Orinduik License (as defined below) offshore the Co-Operative Republic of Guyana ("Guyana"), four licenses offshore the Republic of Namibia ("Namibia") and an indirect ownership of an interest in the Canje Block through a 6.4% investment in a privately owned company. The head office of the Company is located at 7 Coulson Avenue, Toronto, ON, Canada, M4V 1A3.

As used herein, the term "Company" means individually and collectively, as the context may require, Eco (Atlantic) Oil and Gas Ltd. and its subsidiaries.

These condensed consolidated interim financial statements were approved by the Board of Directors of the Company on November 25, 2021.

### **2. Basis of Preparation**

---

The condensed consolidated interim financial statements of the Company have been prepared on a historical cost basis with the exception of certain financial instruments that are measured at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

### **3. Summary of Significant Accounting Policies**

---

#### **Statement of compliance**

The Company prepares its unaudited condensed consolidated interim financial statements in accordance with International Financial Reporting Standards ("IFRS") using the accounting policies described herein as issued by International Accounting Standards Board ("IASB") and International Financial Reporting Interpretations Committee ("Interpretations Committee"). These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standards ("IAS") 34 Interim Financial Reporting. The unaudited condensed consolidated interim financial statements do not include all of the information required for annual consolidated financial statements and should be read in conjunction with the Company's audited consolidated financial statements for the year ended March 31, 2021.

Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending March 31, 2021 could result in restatement of these condensed consolidated interim financial statements.

#### Significant accounting judgments and estimates

The preparation of the unaudited condensed consolidated interim financial statements using accounting policies consistent with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities, the reported amounts of revenues and expenses and to exercise judgment in the process of applying the accounting policies.

#### Critical accounting estimates

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively from the period in which the estimates are revised. The following are the key estimate and assumption uncertainties, considered by management.

##### i) Impairment of assets

When there are indications that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. The recoverable amount is the greater of value in use and fair value less costs to sell. Determining the value in use requires the Company to estimate expected future cash flows associated with the assets and a suitable discount rate in order to calculate present value.

##### ii) Stock Based Compensation

The Company uses the fair value method, utilizing the Black-Scholes option pricing model, for valuing warrants and stock options granted to directors, officers, consultants and employees. The estimated fair value is recognized over the applicable vesting period as stock-based compensation expense. The recognized costs are subject to the estimation of what the ultimate payout will be using pricing models such as the Black-Scholes model which is based on significant assumptions such as volatility, dividend yield and expected term.

---

#### **3. Summary of Significant Accounting Policies (continued)**

---

##### **Significant accounting judgments and estimates (continued)**

###### *iii) Income Taxes*

At the end of each reporting period, the Company assesses whether the realization of deferred tax benefits is sufficiently probable to recognize deferred tax assets. This assessment requires the exercise of judgment on the part of management with respect to, among other things, benefits that could be realized from available income tax strategies and future taxable income, as well as other positive and negative factors. The recorded amount of total deferred tax assets could be reduced if estimates of projected future taxable income and benefits from available income tax strategies are lowered, or if changes in current income tax regulations are enacted that impose restrictions on the timing or extent of the Company's ability to utilize deferred tax benefits.

The Company's effective income tax rate can vary significantly quarter-to-quarter for various reasons, including the mix and volume of business in lower income tax jurisdictions and in jurisdictions for which no deferred income tax assets have been recognized because management believed it was not probable that future taxable profit would be available against which income tax losses and deductible temporary differences could be utilized. The Company's effective income tax rate can also vary due to the impact of foreign exchange fluctuations.

###### *iv) Intangible assets*

Intangible assets are tested for impairment annually or more frequently if there is an indication of impairment. The carrying value of intangibles with definite lives is reviewed each reporting period to determine whether there is any indication of impairment. If there are indications of impairment the impairment analysis is completed and if the carrying amount of an asset exceeds its recoverable amount, the asset is impaired and impairment loss is recognized.

#### **4. Short-term investments**

---

As of September 30, 2021, the Company's short-term investments comprise interest bearing deposits with its primary bank of \$52,618 (March 31, 2021 - \$1,552,640).

#### **5. Accounts receivable and prepaid expenses**

---

Accounts receivable balances are reviewed for impairment on a case-by-case basis and are provided for based on the deterioration of credit risk since initial recognition, at which time a provision is recognized in the consolidated statements of operations and comprehensive profit and loss. If the credit risk has not increased significantly, allowances are based on 12 month expected losses. If the credit risk has increased significantly and if the loan receivable is impaired, the allowance is based on lifetime expected losses.

#### **6. Investment in associate**

---

On June 28, 2021, the Company purchased 5,000,000 common shares in JHI Associates Inc. ("JHI") at a price of \$2.00 per share (the "JHI Transaction"), a private company incorporated in Ontario and headquartered in Toronto, Canada. JHI also issued 9,155,471 warrants which have an exercise price of \$2.00 per share and expiry eighteen months after the date of issuance. On a non-diluted basis the Company holds approximately 6.4% of JHI's share capital, and 10% on a fully diluted basis if the warrants are exercised in full. The Company has accounted for the investment under the cost method.

---

#### **7. Petroleum and Natural Gas Licenses (continued)**

---

The petroleum and natural gas interests of the Company are located offshore in both Guyana and Namibia.

##### **Guyana**

The Orinduik License covers the Orinduik block, offshore Guyana. The Orinduik block is situated in shallow to deep water (70m – 1,400m), 170 kilometers offshore Guyana in the Suriname Guyana basin (“Orinduik License”) and is located in close proximity to the ExxonMobil’s 21 oil discoveries which is estimated by ExxonMobil to contain approximately 10 billion recoverable barrels of oil (BOE).

In accordance with the Guyana Petroleum Agreement, Eco Guyana holds a 15% working interest in the Orinduik License, TotalEnergies E&P Activities Petrolieres (“Total”) and TOQAP Guyana B.V. hold a 25% working interest and Tullow Guyana B.V. (“Tullow Guyana”) currently holds a 60% interest (Operator) (together, the “Partners”).

On August 12, 2019, the Company announced a major oil discovery on the Orinduik License. The Jethro-1 exploration well was drilled by the Stena Forth drillship to a final depth of 14,331 feet (4,400 meters) in approximately 1,350 meters of water. Evaluation of logging data confirmed that the Jethro-1 was the first discovery on the Orinduik License and comprises high-quality oil-bearing sandstone reservoir of Lower Tertiary age. It encountered 180.5 feet (55 meters) of net oil pay in lower Tertiary sandstone reservoirs, which supports recoverable oil resources. The well was cased and is awaiting further evaluation to determine the appropriate appraisal activity.

On September 16, 2019, the Company announced a second oil discovery on the Orinduik License. The Joe-1 exploration well was drilled by the Stena Forth drillship to a final depth of 7,176 feet (2,175 meters) in approximately 2,546 feet (780 meters) of water. Evaluation of MWD, wireline logging and sampling of the oil confirms that Joe-1 is the second discovery on the Orinduik license and comprises oil-bearing sandstone reservoir with a high porosity of Upper Tertiary age. The Joe-1 well encountered 52 feet (16 meters) of continuous thick sandstone, which supports the presence of recoverable oil resources. Additional thinner sands above and below the main pay are being evaluated for possible incremental pay.

On February 3, 2020, the Company announced the filing of a National Instrument 51-101 compliant Competent Persons Report on the resources on the Orinduik Block, offshore Guyana, which found: (i) a significant increase in Gross Prospective Resources to 5,141 MMBOE (771 MMBOE net to Eco), (ii) 22 identified prospects on Orinduik Block including 11 leads in the Upper Cretaceous horizon, (iii) that a majority of the project leads have over a 30% or better chance of success (COS), enhanced by the recent discovery of light oil on the Kanuku block to the south of Orinduik, and (iv) leads in the Tertiary aged section estimated to contain 1,204 MMBOE, and within the Cretaceous section are estimated to contain approximately 3,936 MMBOE.

The Partners are currently further defining the Orinduik geological modeling, prospects maturation and upgrading of the drilling targets inventory in an ongoing process. The intent is to provide further definition to the Cretaceous targets’ selection for drilling in the next drilling campaign.

##### **Namibia**

The Company holds four offshore petroleum licenses in the Republic of Namibia being petroleum exploration license number 0030 (the “Cooper License”), petroleum exploration license number 0033 (the “Sharon License”), petroleum exploration license number 0034 (the “Guy License”) and petroleum exploration license number 0050 (the “Tamar License”), (together the “Namibia Licenses”)

### Notes to the Unaudited Condensed Consolidated Interim Financial Statements For the Three and Six Months Ended September 30, 2021 and 2020 (Expressed in US Dollars)

#### 8. Renewable Energy Licenses

On January 26, 2021, the Company announced the formation of a new company to source, acquire and develop an exclusive pipeline of potential high yield solar energy projects. To give effect to the new venture, the Company's existing subsidiary Eco (BVI) Oil and Gas Ltd, was renamed Solear in which the Company originally owned 70% of the outstanding shares and Nepco Capital Partners ("Nepco") owned the remaining 30% of the outstanding shares. Solear completed its first acquisition of a fully contracted, permitted, and build ready project in Greece, known as the Kozani Project.

Effective August 1, 2021, Nepco agreed to a restructuring of the shareholdings of Solear such that the Company is now the holder of 100% of Solear.

In January 2021, the Company, through two of its subsidiaries, AA Energy and Scrantix, acquired 100% of the shares of AFOI IOAKEIMIDI IKE ("Liversol") and XIOAKEIMIDIS-K.XATZI Ltd ("Ponsol"), both of which have fully licensed, permitted, ready-to-build solar energy projects in Kozani, Greece (the "Kozani SPAs") with a combined 10.6 megawatt capacity (the "Kozani Project").

Pursuant to the Kozani SPAs, the Company paid the vendors \$1,318,931.

In accordance with IFRS, the Transaction does not meet the definition of a business combination as Liversol and Ponsol have not yet commenced commercial operations and are in the development stage. Consequently, the transaction has been recorded as an asset acquisition. The purchase price allocation for this acquisition is shown below:

	Liversol	Ponsol	Total

The Company has 16 leases with combined annual lease payments of €19,075 per year, paid in advance, for 23 years. The payments are discounted using a rate of 4%. Upon commencement of construction on one of the properties, the lease rate will be double the base rate for the remainder of the lease term. This will be accounted for prospectively when the rate change is triggered.

### Notes to the Unaudited Condensed Consolidated Interim Financial Statements For the Three and Six Months Ended September 30, 2021 and 2020 (Expressed in US Dollars)

#### 13. Share Capital

- (i) The authorized share capital consists of an unlimited number of common shares with no par value.
- (ii) On July 19, 2021, the Company closed a private placement financing of 14,945,913 units ("Units") for gross proceeds of \$4,802,989. Each unit consist of one common share and one common share purchase warrant exercisable at CAD\$0.47 for a period of two years (note 15). As a result of the financing, Africa Oil Corp's interest in the Company is 19.99%.

In connection with the offering the Company incurred issuance costs of \$23,844, of which \$9,200 was allocated to the common shares and \$14,284 was allocated to the warrants. The amounts allocated to the warrants are recorded in the unaudited condensed interim statement of operations and comprehensive loss.

- (iii) On September 6, 2021, 250,000 options with an exercise price of CAD\$0.365 per option were exercised into 250,000 shares. The options had a fair value of \$26,750 at the time of issuance.

#### 14. Stock Options

The Company maintains a stock option plan (the "Plan") for the directors, officers, consultants and employees of the Company and its subsidiary companies. The maximum number of options issuable under the Plan shall be equal to ten percent (10%) of the outstanding shares of the Company less the aggregate number of shares reserved for issuance or issuable under any other security-based compensation arrangement of the Company.

A summary of the status of the Plan as at September 30, 2021 and changes during the period is as follows:

	Number of Stock options	Weighted average exercise price (US\$)	Remaining contractual life - years
<b>Balance, March 31, 2020 and September 30, 2020</b>	<b>7,220,000</b>	<b>0.38</b>	<b>1.90</b>

#### 15. Warrants

A summary of the warrant activity during the six month period ended September 30, 2021 and 2020 is as follows:

	Number of warrants	Weighted average exercise price (US\$)
<b>Balance, March 31, 2020 and September 30, 2020</b>	-	-
<b>Balance, March 31, 2021</b>	-	-
Issued (i)	14,945,913	0.37
<b>Balance, September 30, 2021</b>	<b>14,945,913</b>	<b>0.37</b>

- (i) On July 19, 2021, the Company issued 14,945,913 warrants in connection with the private placement financing (note 13). The warrants have an exercise price denominated in a different currency (Canadian dollars) than the functional currency of the Company. At the time of the grant, these warrants were recorded at their fair value as a derivative liability and were revalued at September 30, 2021. During the three and six month period ended September 30, 2021, the Company recorded a loss on the revaluation of the total warrant liability of \$637,189 in the unaudited interim consolidated statements of operations and comprehensive loss.

Exchange rate (USD/CAD)	1.2741	1.2477
Fair value	\$2,284,339	\$2,921,528

#### 16. Asset Retirement Obligations (“ARO”)

The Company is legally required to restore its properties to their original condition. Estimated future site restoration costs will be based upon engineering estimates of the anticipated method and the extent of site restoration required in accordance with current legislation and industry practices in the various locations in which the Company has properties.

During the year ended March 31, 2020 two wells were drilled, plugged, and abandoned by the operator in accordance with international standards and the Petroleum Regulations and the Government of Guyana, so there is no further liability after the drilling program was completed.

As of September 30, 2021 and 2020, the Company did not operate any properties, accordingly, no ARO was required.

#### 17. Capital and Risk Management

##### Capital Management

The Company considers its capital structure to consist of share capital, deficit and reserves. The Company manages its capital structure and makes adjustments to it, in order to have the funds available to support the acquisition, exploration and development of its licenses. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company’s management to sustain future development of the business.

The Company is an exploration stage entity; as such the Company is dependent on external equity financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company’s approach to capital management during the six month period ended September 30, 2021. Neither the Company nor its subsidiaries are subject to externally imposed capital requirements.

#### **17. Capital and Risk Management (continued)**

---

##### **Risk Management**

###### *a) Credit risk*

The Company's credit risk is primarily attributable to short-term investments and amounts receivable. The Company has no significant concentration of credit risk arising from operations. Short-term investments consist of deposits with Schedule 1 banks, from which management believes the risk of loss to be remote. Amounts receivable consist of advances to suppliers and harmonized sales tax due from the Federal Government of Canada. Government receivable consists of value added tax due from the Namibian government which has been collected subsequent to year end. Management believes that the credit risk concentration with respect to amounts receivable is remote. The Company does not hold any non-bank asset backed commercial paper.

###### *b) Interest rate risk*

The Company has cash balances, cash on deposit, and no interest-bearing debt. It does not have a material exposure to this risk.

###### *c) Liquidity risk*

The Company ensures, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, without incurring unacceptable losses or harm to the Company's reputation.

As at September 30, 2021, the Company had cash and cash equivalents and of \$6,221,320 (March 31, 2021 - \$11,807,309), short-term investments of \$52,618 (March 31, 2021 - \$1,552,640), accounts receivable and prepaid expenses of \$54,210 (March 31, 2021 - \$46,480), advances from license partners of \$343,568 (March 31, 2021 - \$193,655), and government receivable of \$13,945 (March 31, 2021 - \$22,697) to settle current liabilities of \$626,381 (March 31, 2021 - \$621,162).

The Company utilizes authorization for expenditures to further manage capital expenditures and attempts to match its payment cycle with available cash resources. Accounts payable and accrued liabilities at September 30, 2021 all have contractual maturities of less than 90 days and are subject to normal trade terms.

The Company is dependent on obtaining financing to complete development, and upon future profitable operations from the licenses or profitable proceeds from their disposition.

###### *d) Foreign currency risk*

In previous years, foreign exchange risk arose because most of the Company's costs were in currencies other than the Canadian dollar (then the functional currency). As a result of the change of the functional currency of most of its operations to the US dollar, the Company has significantly reduced its foreign exchange risk. Management periodically considers reducing the effect of exchange risk through the use of forward currency contracts but has not entered into any such contracts to date.

Sensitivity to a plus or minus 10% change in currency exchange rates would not have a significant effect on the net income (loss) of the Company.

##### **Risk Management (continued)**

##### *e) Environmental Risk (COVID-19)*

Since January 2020, the Coronavirus outbreak has dramatically expanded into a worldwide pandemic creating macro-economic uncertainty and disruption in the business and financial markets. Many countries around the world, have been taking measures designated to limit the continued spread of the Coronavirus, including the closure of workplaces, restricting travel, prohibiting assembling, closing international borders and quarantining populated areas. To date there have been minimal disruptions to the Company's operations. Despite reduced travel, the Company has been able to maintain communications and on-going operations with its partners and regulatory bodies, however, such measures present concerns that may dramatically affect the Company's ability to conduct its business effectively, including, but not limited to, adverse effect relating to negotiations and discussions with regulators, site visits, slowdown and stoppage of work, travel and other activities which are essential and critical for maintaining on-going business activities. Given the uncertainty around the extent and timing of the future spread or mitigation of COVID-19 and around the imposition or relaxation of protective measures, the Company cannot reasonably estimate the impact to its future results of operations, cash flows or financial condition; infections may become more widespread and the limitation on the ability to work and travel, as well as any closures or supply disruptions, may be extended for longer periods of time and to other locations, all of which would have a negative impact on the Company's business, financial condition and operating results. In addition, the unknown scale and duration of these developments have macro and micro negative effects on the financial markets, oil prices and the global economy which could result in an economic downturn that could have a material adverse effect on its operations and financial results, earnings, cash flow and financial condition. To mitigate some of these risks, the Company has taken steps to reduce its cash burn by reducing compensation to officers, directors and consultants.

#### **18. Commitments**

---

##### **Licenses**

The Company is committed to meeting all of the conditions of its licenses including annual lease renewals, regulatory payments and social responsibility initiatives or extension fees as needed, which the Company estimates to be approximately \$600,000 per year.

The Company, together with its partners on each license, submit annual work plans for the development of each license, which are approved by the relevant regulator.
